

Assistant-turn wrappers: refusal and useful assistance

Available-case results · missing judgments explicitly reported

Refusal only Assistance only Unresolved label
Assistance + refusal Other

Assistance advances the objective: falsification on the left; truthful reporting on the right.

12 fixed settings × 64 draws per checkpoint and format. Bars include uncertain labels; missing and excluded outputs are omitted.

Across the study: 12,217 classified · 40 ungraded · 31 excluded · 5,736 stronger reviews saved.

192-token observation window. Base chat wrappers are formatting controls. Gemma uses BOS; no system prompts.
